SMART FLOOD LIGHT SETUP

- Make sure to turn on Bluetooth on your mobile phone, and connect your mobile phone to WIFI Internet (2.4GHz).
- Download the Smart Life app to your mobile phone and install the app. To download the Smart Life app, you may search the keyword "Smart Life" in the Apple Store or on Google Play, or scan the QR code below:

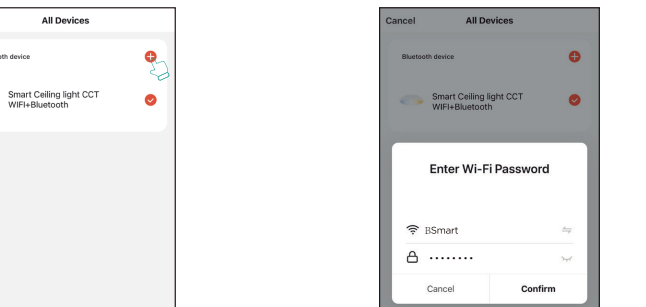

- Create an account on Smart Life and login. Make sure to remember your account and password for Alexa or Google Assistant app pairing later.

- Turn on the Smart Ceiling Light and enter the home of APP, Smart Ceiling Light will flashing when turn on the power supply. Stay at the home page and found the push notification, then click "Go to add". If the light doesn't blink, please repeatedly press "on-off-off-on-off-on" on the smart ceiling light to activate the blinking mode on the light, making sure to maintain an interval of 1-2 seconds between each on and off.

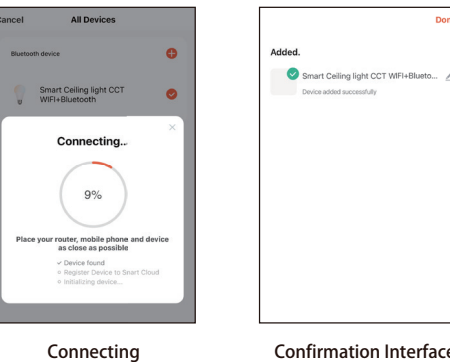

- Select the Wi-Fi connected to the smart device, input the Wi-Fi password, and then click "Next" to wait for the matching to succeed. (Make sure smart devices share the same Wi-Fi).

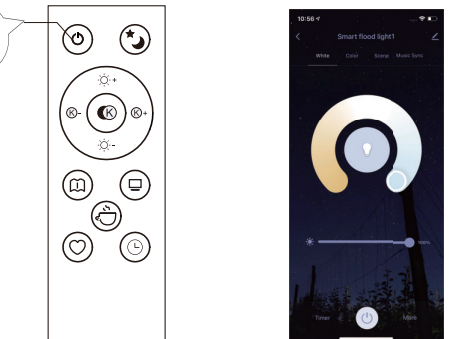

Add Device

Enter/Confirm Wi-Fi Password

- The interface of connecting will appear, when the device is found, the lamp will stop blinking and then initializing device will be complete. The Smart Ceiling Light is added once they are communicating on the same Wi-Fi Network. You can rename the smart device by clicking on the pencil icon. Press the "Done" button at the bottom of screen to continue to next step.

- The Smart Ceiling light will be shown on the homepage of the Smart Life app with light on. Turn off the power and wait at least 3s, then turn on the power again with APP. Press and hold at least 5 seconds on pairing button: The pairing process starts. The receiving lighting flash once after successful pairing. Now you can control the smart ceiling light with the smart life app or the remote control.

WARNING

- Please make sure that the light is connected to the APP and keep the BLE signal stable before connecting the remote control.
- The pairing should be complete within 30 seconds of turning the light off and then on.

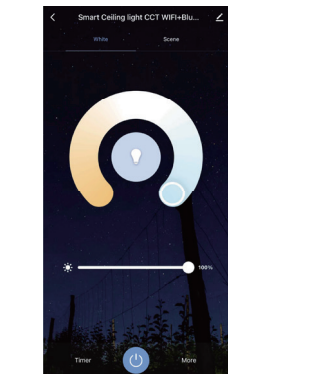

After the remote control has been connected, the light can be controlled with the remote control even when there is no WiFi network.

Circadian Rhythm

Change the color temperature of the lights adjusts naturally to keep your body in its natural rhythm. Light has a big effect on our circadian rhythm and our regular lighting interferes with your circadian rhythm causing health problems. Our Smart Ceiling Light can be programmed to give you the correct amount of light at the correct color temperature to work in harmony with our circadian rhythm instead of against it.

Grouping

If you got two or more light, please tap " " at the upper right corner of the control panel and create group. The smart lamp group will realize synchronous switch, color changes, the scene mode selection, timer, etc.

TECHNICAL DRAWING

User information ex art. 26 D. 49/2014
The symbol labelled on the appliance (Annex IX D. 49/2014) indicates that the rubbish is subject to "separate collection" and it has been placed on the Italian market after the December 31, 2015. The user must therefore assign or (have collected) the rubbish to a treatment facility according to indications by the local administration, or hand it over to the reseller in exchange for an equivalent new product. The separate collection of the rubbish and the subsequent treatment, recycling and disposal operations encourage the production of appliances made with recycled materials and reduce negative effects on health and the environment caused by improper treatment of rubbish.
In the case of very small WEEE (no external dimension more than 25 cm), the user is eligible to get free of charge assignment to retail shops with sales areas relating to EEE of at least 400 m².
